

## Comparison of bib $\TeX$ styles

This document illustrates many different “author (year)” styles in bib $\TeX$  (all using the natbib package) with the same literature citations. The L<sup>A</sup>T<sub>E</sub>X code used to generate each example is

```
\documentclass{article}
\usepackage{natbib}
\def\style{newapa}    %% (This was changed each time) %%
\begin{document}
\section*{Citation tests using the \texttt{\style} style}
\begin{tabular}{l}
Type & Text style & Parenthesized style \\ \hline
Book & \cite{And74} & \citep{And74} \\
Article & \cite{Asp49,And80} & \citep{Asp49,And80} \\
Tech report & \cite{Don99} & \citep{Don99} \\
In-collection & \cite{Kin85} & \citep{Kin85}
\end{tabular}
\bibliography{design}\bibliographystyle{\style}
\end{document}
```

Looking at the examples, you will find differences in use of capitalization and punctuation, how the date is formatted, use of italics and boldface, whether “&” or “and” is used, how second and third authors are treated, etc. The distinctions can be subtle. Note that in some styles, the title of an article isn’t even shown. (Unfortunately, this also shows several renderings of the same spelling error in the .bib file.)

## Citation tests using the agsm style

Type	Text style	Parenthesized style
Book	Anderson & McLean (1974)	(Anderson & McLean 1974)
Article	Aspin (1949), Andrews et al. (1980)	(Aspin 1949, Andrews et al. 1980)
Tech report	Dong & Nair (1999)	(Dong & Nair 1999)
In-collection	Kinzer (1985)	(Kinzer 1985)
